

Lucy's Warbler Foraging Effort Datasheet (using a stop watch or app that has a "laps" option is very useful) Start time: 8:30 end time: 9:15 am						Observer(s): Jennae MacFarland	Date: 04/05/2017	Location: (general area or address) Santa Cruz River @ Speedway, east Bank
Individual (initials, #, ie. JCM_01)	Start Time (begin w/0)	Stop Time	Velvet mesq	non- native mesq	other tree species	foraging effort (hash marks or dots each time you observe the bird "peck" at an insect)	Comments: (any and all observations are useful)	
JCM_01	0	:35	✓			:: (4)	clear morning, many birds singing	
							bird calling with chip notes constantly	
JCM_01	:35	1:20		✓		: (2)		
JCM_01	1:20	3:45	✓			L (6)		
JCM_01	3:45	4:15			✓ paloverde	(8)	lost track of bird after 4 minutes 15 seconds	
JCM_02	0	:50	✓			#### (9)	very active forager, frequent singing	
JCM_02	:52	1:20		✓		(2)		
↓	1:20	1:40			✓ paloverde	L (6)		
↓	1:40	3:00			✓ cottonwood	XX: (22)	Spent a lot of time in this cottonwood	
↓	3:00	3:30	✓			: (2)	Caught a small spider!	
JCM_03	0	1:20		✓		XXXX: (42)	bird silent	
↓	1:20	1:30	✓			: (2)		
↓	1:30	2:45	✓			XXX: (33)		
↓	2:45	4:50	✓			50	foraging rapidly, had to estimate	

Note 1: This sheet is showing foraging observations for three different Lucy's warblers
 Note 2: An approximation of how many "pecks" a bird takes is fine. Your best guess is better than nothing.

This is a second bird →
